Success Story: De Keizer Marine Engineering

De Keizer Marine Engineering is a global company of highly trained technology experts who implement and oversee super yacht engineering and instrumentation along with servicing and training. The company uses ICONICS software for extensive integration with advanced marine technology.

ICONICS software provides the highest level of alarm and control management to ensure ship safety through onboard system visualization and alarming capabilities as well as information automation and file generation to reduce project work hours. Some of the benefits De Keizer realizes when using our software are:

- Easy and multiple module designs for extensive system integration.
- Design of comprehensive dashboards and generation of CSV files based on an I/O list.
- Alarm and control management to ensure ship safety for bilge, stability, tank, fire, and refrigeration/freezer alarm.
